

## Instructions for use

### When to Use

Worms are most active in the upper surface of the lawn between September and March, or when the soil water increases and the soil air decreases. This product can be used all year round if worm casts are present.

**Where to Use** For use on lawns.

### How to Use

SHAKE WELL BEFORE USE AND USE MIXTURE IMMEDIATELY  
When newly opened, remove screw cap, invert cap and use cutter in cap to break foil lid.

Initial dosage: Measure 200 millilitres and add to a minimum 2.5 litres of water in a garden sprayer. Apply as a blanket spray over 100 square metres of lawn.

Repeat every 10-20 days with a reduced dosage measure of 70 millilitres added to a minimum 2.5 litres of water in garden sprayer.

Note: Wash out the sprayer thoroughly before and after use.

## Safety Instructions

Protection during use

AVOID SKIN AND EYE CONTACT

Wear suitable gloves and face protection

WASH OFF SPLASHES IMMEDIATELY

WASH HANDS AND EXPOSED SKIN AFTER USE

COULD BE HARMFUL IF SWALLOWED

Keep out of reach from children

## Environmental Protection

Non pesticide CLASSIFIED AS NON HAZARDOUS  
WORMS ARE UNHARMED

Non harmful to children and pets.

## Storage and Disposal

KEEP CONCENTRATE AWAY FROM CHILDREN AND PETS  
KEEP IN ORIGINAL CONTAINER, tightly closed in a safe, cool and frost protected place.

Dispose of empty container in dustbin

Dispose of unused product in its container in general rubbish

**NEW**

# CastClear™ Lawn Worm Cast Suppressant

## Worm Deterrent and Soil Penetrant (LIQUID)

A nutrient based unique blend of worm deterrent and soil penetrants contains:

More than 5% amino nitrogen

More than 15% organic sulphur

# CastClear™

## The solution to worm casts in lawns

CastClear™ is a unique combination of nutrient materials that have been clearly shown to reduce worm-cast levels on lawns and sports turf. Close scientific evaluation has shown that this NEW product does not kill worms or reduce populations but does deter worms from travelling through treated soil. It is unique in using a surfactant system that moves the nutrient into the upper soil structure and fixes it there providing good persistence of deterrent effect until broken down to natural nutrients absorbed by plant roots. It can be used with absolute safety from first tiller formed on new seeds at low rates of application and year round on established turf.

- Deters worms casting for up to 20 days
- Non Pesticide
- Nutrient based with soil penetrants and organic sulphur
- Proven control on lawns and sports turf
- Mixed with water and applied with a general garden sprayer
- 1 litre treats up to 500 square metres
- Repeat application at a third of the full dose rate
